

BOTSA SRIHARSHITHA

Software Engineering Intern Candidate | React.js & Full-Stack Development | REST APIs & System Design

+91 9676039334 | harshabotsa13@gmail.com | linkedin.com/in/sriharshitha-botsa | github.com/SriHarshitha137 | Visakhapatnam, India

PROFESSIONAL SUMMARY

Computer Science & Engineering undergraduate with a **9.17 CGPA (Top 5% of 200+ CSE students)** and hands-on software engineering experience shipping **production-grade** features across **6 shipped projects** using **React.js**, **JavaScript (ES6+)**, **TypeScript**, and **Node.js**. Experienced writing high-quality **pull requests** with **95%+ test coverage**, participating in **code reviews** and design discussions, and collaborating with engineers and **cross-functional stakeholders** in **Agile/Scrum** environments. Comfortable independently learning **unfamiliar systems and codebases**, integrating **REST APIs**, and reasoning about how a service handles an **HTTP request** end-to-end. Strong fundamentals in **Data Structures & Algorithms (180+ problems solved)**, **debugging**, and **root-cause analysis**; a fast learner who quickly picks up new languages and frameworks.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js (functional components, hooks, state/props), Node.js, Express.js, Next.js, React Native (familiar), HTML5, CSS3
- **Backend & APIs:** REST APIs, HTTP request/response handling, WebSockets, JWT/RBAC Authentication, Microservices, Asynchronous Programming (fetch/axios)
- **Databases & Cloud:** PostgreSQL, MySQL, MongoDB, Firebase Firestore, Redis, AWS (EC2/S3), Vercel, Docker, Kubernetes
- **Engineering Practices:** Code Reviews, Pull Requests, 95%+ Test Coverage, Git, GitHub Actions (CI/CD), Agile/Scrum, Debugging, Root-Cause Analysis, Data Structures & Algorithms (180+ problems)
- **UI/UX & Design:** Figma-to-Code Translation, Reusable Component Libraries (15+ components), Responsive/Mobile-First Design, Accessibility (WCAG basics), Cross-Browser Compatibility, SEO Fundamentals

EXPERIENCE

Full-Stack Developer Intern | Tiesverse

April 2026 – Present

- **Engineered** and shipped **production** React.js UI components for a 75+ tool document-processing platform, translating stakeholder requirements into reusable, cross-browser-compatible features.
- Integrated frontend with backend **REST APIs** and asynchronous task queues (Celery + Redis), architecting non-blocking data flows and reasoning about how a service handles an **HTTP request** end-to-end for high-throughput workloads.
- Gave and received technical feedback through **code reviews** and sprint planning; collaborated with engineers and **cross-functional stakeholders** in **Agile/Scrum** ceremonies to debug UI issues and improve code quality and maintainability across the SDLC.

AI/ML Intern | Infosys Springboard Virtual Internship 7.0

July 2026 – Present

- Applied **data structures**, **algorithms**, and system design principles to **engineer** end-to-end pipelines, strengthening problem-solving and **debugging** skills transferable to frontend logic and state management.
- Wrote clean, maintainable, well-documented, **production-quality code**, proactively seeking feedback from mentors to apply industry best practices and quickly learn **unfamiliar systems**.

Open Source Contributor | GirlScript Summer of Code 2026

May 2026 – Present

- Contributed UI/UX improvements, **debugging** fixes, and documentation updates via Git feature-branch workflows and **pull requests** in a collaborative, fast-paced open-source environment (**Rank 443** among global contributors).
- **Refactored** a Streamlit-based IPL analytics app (CricScope) into a dark-themed, responsive design system, improving visual consistency and UI/UX across team cards and dashboards.
- Debugged and resolved cross-browser SVG/PNG rendering defects for team-logo assets on dark backgrounds, improving **cross-browser compatibility** and visual reliability.
- Collaborated with global contributors through **pull requests** and **code reviews**, independently learning **unfamiliar codebases** and applying best practices for maintainable, well-documented code.

Infosys Springboard Pragati: Path to Future — Cohort 9

July 2026 – Present

- Selected for an industry-aligned program building future-ready technical and professional skills through structured **mentorship**, demonstrating eagerness to learn and adapt to new systems and technologies.
- Engaged in structured workshops on professional communication, problem-solving, and industry-readiness alongside a peer cohort in a collaborative, fast-paced setting.
- Applied mentor and peer **feedback** iteratively to strengthen code quality, **debugging** discipline, and overall engineering best practices.

PROJECTS

Sync Fission — AI-Powered Collaborative Learning Platform

Sep 2025 – Oct 2025

React.js, Node.js, PostgreSQL, WebSockets, JWT/RBAC

- Solved the need for a reliable, real-time collaboration platform with secure role-based access by **engineering** a responsive React.js frontend consuming **20+ RESTful APIs** via asynchronous fetch calls, achieving **sub-100ms query response times** with **zero downtime**.
- **Architected** JWT + RBAC authentication across **3 user roles** and implemented real-time **WebSocket** communication, delivering a smooth, reliable cross-device experience.

SheShield — Real-Time SOS Alert Platform

Jan 2026 – Feb 2026

React.js, Node.js, Firebase, WebSockets

- Solved unreliable emergency-alert delivery during network outages by **engineering** a mobile-first, offline-first React.js interface, reducing delivery latency by **~40%** and eliminating data loss.
- Led a 5-member team**, enforcing a Git feature-branch strategy with **95%+ test coverage** through structured **code reviews**, cutting merge-conflict resolution time by **60%**.

PayFlow — Secure Digital Payments Platform

Mar 2025 – May 2025

React.js, Node.js, MongoDB, OWASP Security

- Solved slow, inconsistent fintech UI development by **building** a reusable React component library (**15+ components**) using functional components and hooks, cutting UI development time by **40%**.
- Engineered** a responsive, secure wallet-management UI with JWT + bcrypt authentication, ensuring reliability under concurrent load.

GigLedger — AI-Powered Financial Identity & Income Verification Platform

Jan 2026 – Mar 2026

React.js, Node.js, Vercel, AI APIs | Live: [gig-ledger-income-tracking-tax-simp.vercel.app](#)

- Solved gig workers' lack of a unified way to verify income across platforms for loans by **building and deploying** a responsive React.js dashboard aggregating income across **4 gig-economy platforms**, integrating **REST APIs** and asynchronous data flows for real-time verification.
- Designed** automated income-reconciliation logic to cross-check multi-platform earnings, reducing manual verification effort with an audit-ready, user-friendly UI.

LLMCodeBench — LLM Evaluation & Benchmarking Framework

May 2026 – Jun 2026

Python, Automated Testing, Data Analysis

- Solved the lack of a rigorous way to evaluate LLM-generated code by **designing** a research-grade benchmarking framework of **80 programming tasks** assessing code generation and debugging accuracy, applying strong problem-solving and **root-cause analysis** skills.

EDUCATION

- B.Tech, Computer Science & Engineering** | Anil Neerukonda Institute of Technology & Sciences, Visakhapatnam — **CGPA: 9.17/10.0** (Top 5% of 200+ CSE students) | 2024 – 2028
- Intermediate (MPC) — 97% | Tirumala Junior College, Visakhapatnam | 2022 – 2024
- School: Sri Bhavani Vidyaniketan — 96.1% | 2021 – 2022

CERTIFICATIONS

- SQL and Relational Databases 101 — IBM Skills Network / Cognitive Class (2026) | Foundations of Prompt Engineering — AWS Training & Certification (2026)
- Data Structures & Algorithms — APNA College (2025) | Full Stack Web Development — APNA College (2025)
- Programming in Java (Object-Oriented Programming) — NPTEL (2025) | Artificial Intelligence — IBM SkillsBuild (2026)
- Cloud Business Jumpstart — Oracle (2026)

ACHIEVEMENTS & EXTRACURRICULARS

- Solved **180+ Data Structures & Algorithms problems** on LeetCode/GeeksforGeeks, demonstrating strong problem-solving and **debugging** skills.
- Shipped **6 production-grade projects** spanning React.js frontend engineering, fintech, and applied ML, including a **Diamond Price Prediction model achieving $R^2 = 0.9744$** .
- Top 5% academically** (9.17 CGPA) among 200+ B.Tech CSE students; simultaneously interning at Tiesverse and Infosys Springboard while contributing to open source — demonstrating strong time management in a fast-paced, collaborative environment.
- Ranked 443** among global contributors in GirlScript Summer of Code 2026, reflecting consistent, high-quality **debugging** and UI/UX contributions to a large-scale open-source codebase.
- Earned **5+ industry certifications** spanning cloud (Oracle, AWS), AI/ML (IBM SkillsBuild), full-stack development (APNA College), and databases (IBM Skills Network).
- Reduced UI development time by **40%** and merge-conflict resolution time by **60%** across projects through reusable component design and structured Git workflows.
