

BOTSA SRIHARSHITHA

Computer Science Undergraduate | HTML, CSS, JavaScript | Python, Java, C++

+91 9676039334 | harshabotsa13@gmail.com | linkedin.com/in/sriharshitha-botsa | github.com/SriHarshitha137 | Visakhapatnam, India

PROFESSIONAL SUMMARY

Second-year **Computer Science** undergraduate pursuing a **Bachelor's Degree** (B.Tech) at Anil Neerukonda Institute of Technology & Sciences (Class of 2028) with a 9.17 CGPA (Top 5% of 200+ CSE students) and hands-on **front-end development** experience using **HTML, CSS, and JavaScript**. Strong foundation in **object-oriented programming** (Java, C++) and **scripting languages** (Python, JavaScript), with 180+ **data structures and algorithms** problems solved. **Adept at handling ambiguous or undefined challenges through strong problem-solving abilities**, demonstrated across internships, open-source contributions, and six production-grade software projects. Self-starter who thrives in fast-paced, collaborative environments.

TECHNICAL SKILLS

- **Front-End Technologies:** HTML5, CSS3, JavaScript (ES6+), React.js, Angular, Vue.js, Responsive Web Design
- **Programming Languages:** Java, Python 3, JavaScript, C++, TypeScript, SQL
- **Object-Oriented Programming:** Java, C++, Python — class design, inheritance, polymorphism
- **Scripting & Backend:** Python, JavaScript, Node.js, Express.js, REST APIs
- **Databases:** MongoDB, PostgreSQL, MySQL, Firebase Firestore
- **Core CS & Practices:** Data Structures & Algorithms (180+ solved), Git & GitHub, Agile/Scrum, Automated Testing, Debugging, Problem-Solving

EXPERIENCE

Full-Stack Developer Intern | Tiesverse | Apr 2026 - Jul 2026

- Built and shipped REST API features and reusable **JavaScript/React.js** UI components using **HTML, CSS, and JavaScript** within a distributed, 75+ tool document-processing platform, applying strong **problem-solving abilities** to navigate **ambiguous or undefined** requirements.
- Collaborated through Agile/Scrum ceremonies and Git & GitHub code reviews, contributing to automated testing in a fast-paced environment.

AI/ML Intern | Infosys Springboard Virtual Internship 7.0 | Jul 2026 - Present

- Applied **Data Structures & Algorithms** and **object-oriented** design principles to build **Python** data pipelines, strengthening **problem-solving** skills for **ambiguous**, fast-paced environments.

Open Source Contributor | GirlScript Summer of Code 2026 | May 2026 - Present

- Contributed to repositories using **JavaScript**, React, Node.js, and Angular — Git debugging and documentation fixes via feature-branch workflows in a collaborative, **fast-paced** open-source environment (Global Rank 443 of 20,000+ contributors), **effectively communicating technical challenges and proposed solutions** to a distributed team of global contributors.
- Refactored a **Python** Streamlit-based IPL analytics app (CricScope) into a dark-themed, responsive design system, applying **object-oriented design** principles to improve visual consistency and UI/UX across dashboards.

Infosys Springboard Pragati: Path to Future — Cohort 9 | Jul 2026 - Present

- Selected for an industry-aligned program building future-ready technical and professional skills through structured mentorship, demonstrating curiosity, self-motivation, and the ability to thrive in a **fast-paced**, dynamic environment.
- Engaged in structured workshops on professional communication and independent **problem-solving in ambiguous or undefined** scenarios, alongside a peer cohort.

PROJECTS

Sync Fission — AI-Powered Collaborative Learning Platform | JavaScript, Node.js, Express.js, PostgreSQL, WebSockets | Sep 2025 - Oct 2025

- **Problem:** Students needed a real-time, multi-role platform to collaborate on learning content, but existing tools lacked secure, role-based access and fast data retrieval.
- **Solution:** Architected and built a Node.js/Express.js backend exposing 20+ REST APIs with a distributed architecture, implementing **object-oriented design** with JWT + RBAC authentication across 3 user roles plus real-time WebSocket communication.
- **Impact:** Achieved sub-100ms query response times with zero downtime, delivering a smooth, reliable cross-device user experience.

SheShield — Real-Time SOS Alert Platform | JavaScript, Node.js, React.js, Firebase, WebSockets | Jan 2026 - Feb 2026

- **Problem:** Users in low-connectivity areas needed a way to send emergency SOS alerts reliably, even during network outages.

- **Solution:** Engineered a Node.js backend with an offline-first, distributed architecture and real-time WebSocket alerts; led a 5-member team, enforcing a Git feature-branch strategy with 95%+ automated test coverage through Agile workflows and code reviews.
- **Impact:** Cut alert delivery latency by ~40% with zero data loss during outages, and reduced merge-conflict resolution time by 60%.

PayFlow — Secure Digital Payments Platform | JavaScript, Node.js, Express.js, MongoDB, OWASP Security | Mar 2025 - May 2025

- **Problem:** A fintech wallet system needed secure, reliable transaction handling under concurrent load without a reusable, consistent UI.
- **Solution:** Engineered a Node.js/Express.js backend with MongoDB data modeling, applying **object-oriented design** and JWT + bcrypt authentication, plus a reusable React component library (15+ components) using functional components and hooks.
- **Impact:** Delivered reliable performance under concurrent load and cut UI development time by 40%.

GigLedger — AI-Powered Financial Identity & Income Verification Platform | JavaScript, Node.js, MongoDB, REST APIs, Vercel, AI APIs | Jan 2026 - Mar 2026

Live: <https://gig-ledger-income-tracking-tax-simp.vercel.app>

- **Problem:** Gig workers lacked a unified, verifiable way to track and reconcile income earned across multiple platforms for tax and identity purposes.
- Built and deployed a Node.js backend with **REST APIs** and MongoDB aggregating income across 4 gig-economy platforms in a distributed system, with algorithmic income-reconciliation logic and asynchronous data flows for real-time verification.
- **Impact:** Reduced manual verification effort with an audit-ready, user-friendly UI, live at the link above.

Diamond Price Prediction — ML Regression Model | Python, Pandas, Scikit-learn, Data Processing | 2025

- **Problem:** Raw diamond market data (54,000+ records) contained missing values and outliers, making accurate price prediction difficult.
- Engineered a polynomial regression model in **Python** over 54,000+ records, using systematic feature engineering and **algorithm development**, plus automated data-cleaning and preprocessing scripts to handle missing values and outliers.
- **Impact:** Achieved $R^2 = 0.9744$ prediction accuracy, strengthening independent **problem-solving** and complexity analysis skills.

EDUCATION

B.Tech (Bachelor's Degree), Computer Science & Engineering | Anil Neerukonda Institute of Technology & Sciences, Visakhapatnam
CGPA: 9.17/10.0 (Top 5% of 200+ CSE students) | 2024 - 2028

Relevant Coursework: **Data Structures & Algorithms, Object-Oriented Programming, Web Development (HTML, CSS, JavaScript)**

Intermediate (MPC) — 97% | Tirumala Junior College, Visakhapatnam | 2022 - 2024

School: Sri Bhavani Vidyaniketan — 96.1% | 2021 - 2022

CERTIFICATIONS

- **SQL and Relational Databases 101** — IBM Skills Network / Cognitive Class (2026) | Foundations of Prompt Engineering — AWS Training & Certification (2026)
- **Data Structures & Algorithms** — APNA College (2025) | Full Stack Web Development — APNA College (2025)
- **Programming in Java (Object-Oriented Programming)** — NPTEL (2025) | Artificial Intelligence — IBM SkillsBuild (2026)
- Cloud Business Jumpstart — Oracle (2026)

ACHIEVEMENTS & EXTRACURRICULARS

- Solved 180+ **Data Structures & Algorithms** problems on LeetCode/GeeksforGeeks, demonstrating strong independent **problem-solving** and debugging skills.
- Shipped 6 production-grade software projects spanning distributed backend engineering, fintech, and applied **Python** ML, each emphasizing **REST APIs**, reliability, and performance.
- Top 5% academically (9.17 CGPA) among 200+ B.Tech CSE students; simultaneously interning at Tiesverse and Infosys Springboard while contributing to open source — demonstrating strong ownership and time management in a **fast-paced** environment.
- Ranked 443 among global contributors in GirlScript Summer of Code 2026, reflecting consistent, high-quality debugging and Git & GitHub collaboration on a large-scale open-source codebase.
- Earned 5+ industry certifications spanning cloud (AWS, Oracle), **SQL/relational databases** (IBM Skills Network), and full-stack development (APNA College).
